## GROHE F-DIGITAL DELUXE

Débit recommandé – Pression recommandée

- Les chaudières murales sont insuffisantes .

Dépendant de la configuration il nous faudra 26-54 l/min d'eau chaude à 40°C (si en même temps douches latérales et de tête).

- Un chauffe bain n'en donne que de 13 à 20  
Boiler est indispensable; la capacité est à calculer

- La pression est en général suffisante. Mais les tuyaux? .
